Customer Quality Complaint Notification

To: Quality Assurance Department, ApexPharma Manufacturing Ltd.

From: Purchasing & QA, Medcore Pharmaceuticals Pvt. Ltd.

Date: 03-Sep-2026

Reference: MCP-QC-2026-0091

Subject: Quality Complaint - Metformin Hydrochloride API

Dear QA Team,

We wish to formally report a quality complaint regarding a recent shipment of Metformin Hydrochloride API received from your facility.

Product Name : Metformin Hydrochloride API

Product Strength/Grade : IP/BP

Batch/Lot Number : MFH26CHG2607012A

Manufacturing Date : 12-Jul-2026

Expiry Date : 11-Jul-2028

Quantity Received : 50 kg (2 HDPE drums)

Reported By : Rakesh Iyer, QC Manager, Medcore Pharmaceuticals

Contact : rakesh.iyer@medcore-pharma.example, +91-98200-11223

Nature of Complaint:

During incoming raw-material inspection, our QC lab observed off-white to pale yellow discoloration in a portion of the API powder, along with slightly higher than expected moisture content on Karl Fischer testing. Visual clumping was also noted in one of the two drums (Drum #2). The other drum appeared within normal visual specification.

We are placing this batch on hold pending your investigation and request a formal root cause analysis, CAPA, and confirmation of whether replacement or credit note will be issued.

Regards,

Rakesh Iyer

QC Manager, Medcore Pharmaceuticals Pvt. Ltd.
